

PayStation Elite

ITC Systems' Pay Station ELITE is the perfect solution to charge for and control the use of copiers, printers and other applications.

Overview

The Pay Station ELITE will control MFD's and charge for the copies and prints they produce. Featuring multiple price lines that can distinguish between different prices for color, black and white, page sizes, etc. The Elite combines print release, account loader and copy controller into a single unit.

The Pay Station Elite has a 7.5" Color LCD touch screen and can be equipped with a magnetic swipe, contactless, or barcode card reader for authentication purposes. Communication security is enhanced with SSL/TLS certification over the network. Once the user is authenticated, their print or copy transactions are processed, charged for and logged.

When authenticated, money can also be deposited into their account, or funds can be used to pay for the current transaction. Credit card acceptance is achieved using an integrated system based on cellular technology. Comes with netZcore PRINT, GoPrint and PaperCut Print Release Software embedded and ready to use.

In a library the ELITE will communicate to the Library Management System back end to retrieve Patron information and any outstanding fines or fees. The ELITE will display the Fine amount and the Patron can pay using Cash, Credit/Debit or from an Account.

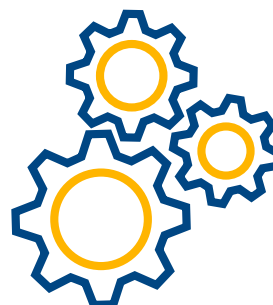

Features

- Pay for Copy and Print
- Print Release Station
- netZcore PRINT and GoPrint Software Integrated to LMS back end
- Pay for Library Fines and Fees
- Supports Registered and Guest Users
- Guest Accounts Available
- Built-in Ethernet Switch
